

**EMERALD  
SUMMIT GREEN**

press kit

**AK-10**

**THE GREEN THAT CARRIES US  
TOWARD HIGHER GROUND**

Green assures.

**It commits.**

A new interpretation of the **Le Temps en Équilibre collection, Emerald Summit Green** explores an active relationship with time — one rooted in focus, anticipation, and mastery of movement. A profound, living green. A green of altitude, concentration, and **quiet control**.

**Time is no longer linear: it is played.**

It finds balance between intuition and discipline, between boldness and restraint.

As in any demanding construction, each element claims its place — the king advances with caution, the queen with freedom. Everything moves, yet nothing is rushed.

On the levitating dial, **Emerald Summit Green** captures the light and redistributes it, revealing ever-shifting nuances. The sunburst or honeycomb motif lends a vibrant, almost breathing depth, where the eye wanders without ever settling.

Inside, the in-house **AK10 calibre, developed exclusively for AKHOR and COSC-certified**, is built around a single requirement: chronometric consistency. Manual winding, high frequency, extended power reserve — **the mechanics accompany the flow of time without interruption.**

A suspended instant completes the mechanical poetry: when the hour shifts, the seconds hand pauses for an infinitesimal moment. The AKHOR-signed counterweight freezes, perfectly aligned with the dial logo. **A halt in time. A breath.** As if space and time briefly resonated in unison, for the span of a single beat.

**The movement is entirely crafted in Geneva, hand-finished** — beveling, fan-shaped Côtes de Genève, wheel finishing — not to be seen, but to be right. Watchmaking by conviction, not by demonstration.

**Emerald Summit Green** embodies a rare balance. That of time — and elevation, of time and space.

## AK-10

### EMERALD SUMMIT GREEN

Steel

**Display** : hours / minutes (rhodium-plated hands with luminescent tips)  
**Seconds** : rhodium-plated seconds hand with AKHOR logo counterweight  
**Dial** : two-disc construction; patented suspension system of the upper disc  
**Pattern** : honeycomb, Vert Émeraude des Cimes colour  
**Case** : cushion-shaped steel case, 39 mm — thickness 11 mm  
**Bezel** : polished  
**Crystal** : sapphire, internal anti-reflective coating  
**Caseback** : transparent sapphire  
**Water resistance** : 30 metres  
**Strap** : hand-stitched green alligator leather — 20 mm x 18 mm  
**Clasp** : polished steel folding clasp

**AK10 calibre**, exclusively developed for AKHOR, manufactured by CLAMAX

**COSC certification et Poinçon de Genève** 

**Manual-winding mechanical movement**

**Frequency** : 28,800 vibrations per hour (4 Hz)

**Power reserve** : 60 hours

**Dimensions** : 31.30 mm diameter — 3.90 mm thickness

117 components — 12 jewels

Hacking seconds function

Variable-inertia balance wheel

**Hand decorations** : anglage, fan-shaped Geneva stripes, wheel finishing

Exclusive cushion-shaped screws

## AK-10-D

### EMERALD SUMMIT GREEN

D Steel Diamond

**Display** : hours / minutes (rhodium-plated hands with luminescent tips)  
**Seconds** : rhodium-plated seconds hand with AKHOR logo counterweight  
**Dial** : two-disc construction; patented suspension system of the upper disc  
**Pattern** : sunburst, Vert Émeraude des Cimes colour  
**Case** : cushion-shaped stainless steel case, 39 mm — thickness 11 mm  
**Bezel** : set with 120 diamonds (0.3 ct)  
**Crystal** : sapphire, internal anti-reflective coating  
**Caseback** : transparent sapphire  
**Water resistance** : 30 metres  
**Strap** : hand-stitched green alligator leather — 20 mm x 18 mm  
**Clasp** : steel folding clasp set with 76 diamonds (0.34 ct)

**AK10 calibre**, exclusively developed for AKHOR, manufactured by CLAMAX

**COSC certification et Poinçon de Genève** 

**Manual-winding mechanical movement**

**Frequency** : 28,800 vibrations per hour (4 Hz)
